

# ABDEL-KHALIQ ABDULLA

Computer Science Student | Software Developer

## Projects

### ByGems Booking System

2024

- Designed and implemented a web-based platform where clients can book events, manage reservations, and reduce the need for walk-in scheduling.
- Used PHP, MySQL, HTML, CSS and JavaScript for backend and frontend functionality.

### Floor Plan Scanner (Ongoing)

2024-Present

- Developing a Unity-based desktop tool to allow users to scan/import blueprints, generate editable 2D/3D floor plans, and visualize them in first-person.
- Focused on structural and architectural planning, excluding interior design.

## Trainings & Seminars

### S.T.A.L.K.E.R. Modding Community

2019-2020

- Informal training focused on scripting and mod development, alongside studying the X-Ray and Monolith engines to understand their features, workflows, and technical foundations.

### Google Online Seminars

2021-2022

- Attended multiple sessions covering broad topics in software development and emerging technologies.

## About Me

As a Computer Science student, I bring a fresh perspective, a strong foundation in coding, and a hunger to learn and contribute. Proficient in Java, C++, Python, PHP HTML and CSS, I'm eager to apply my skills to real-world projects, collaborate effectively, and continue evolving in the dynamic field of technology.
